PERMITTEE:
WATER RECOVERY, LLC
1819 ALBERT STREET
JACKSONVILLE, FL 32202

I.D. NUMBER: FLR 000 069 062
PERMIT NUMBER: 79677-013-HO
DATE OF ISSUE: SEPTEMBER 3, 2020
EXPIRATION DATE: OCTOBER 11, 2025

ATTENTION:
MR. EDWARD MAYLON
GENERAL MANAGER

COUNTY: DUVAL COUNTY
PROJECT: USED OIL PROCESSING FACILITY

Pursuant to authorization obtained by the Florida Department of Environmental Protection (FDEP) under the Resource Conservation and Recovery Act [42 United States Code (U.S.C.) 6901, *et seq.*, commonly known as RCRA], and 40 Code of Federal Regulations 279, this permit renewal is issued under the provisions of Section 403.722 Florida Statutes (F.S.), and Chapters 62-4, 62-160, 62-701, 62-710, 62-730, 62-740, 62-762, 62-777 and 62-780 Florida Administrative Code (F.A.C.). This renewal permit replaces existing permit 79677-HO-012. The above-named Permittee is hereby authorized to perform the work or operate the facility shown in the application dated July 1, 2020 and the supplemental submission dated July 13, 2020, which made the application complete. These submittals are incorporated herein and collectively referred to as the "permit application". The permit application also includes any approved drawing(s), plans, and other documents that are specifically identified and incorporated by reference. The permitted units or permitted activities are specifically described as follows:

To operate a used oil processing facility hereinafter referred to as the "Facility", located on an approximately 1.5-acre parcel of land owned by DLAC/WRI, LLC in Duval County at 1819 Albert Street, Jacksonville, Florida, 32202. A diagram of the site layout and tank storage area are included as Attachment A (Facility Map) of this permit and the tank capacity and contents are shown in Attachment B (Tank Tables) of this permit.

The Facility is authorized to transport, store and process used oil, oily wastewater, petroleum contact water (PCW), oily solid waste, and used oil filters under this permit.

The Facility consists of 12 Aboveground Storage Tanks (ASTs). All of these tanks are regulated under this permit. These tanks may be used to store, or process used oil, petroleum contact water, oily wastewater, and any other non-hazardous wastewater. Of the 12 regulated tanks, seven (7) tanks are dedicated to used oil, two (2) tanks are dedicated to petroleum contact water (PCW), two (2) tanks are dedicated to industrial wastewater and one (1) tank is dedicated to storm water. The contents of each tank, except industrial storm water (ISW), may change from time to time based on market conditions, provided appropriate marking/placarding is provided in accordance with applicable law. However, the volumes of the materials on-site may not exceed the volumes specified in Part II Subparts C and D of this permit. All tanks regulated under this permit are inside a secondary containment area. The use and the capacities of the above ground storage tanks and related appurtenances, currently in use at the facility, are listed in Attachment B of this permit.

The facility has the capacity to store up to 30 55-gallon drums containing used oil or used oil filters in the concrete secondary containment system of the facility's used oil processing area located on the north side
